PIONEER SEED FIRM.
Business Established 1845

THOS. GRISWOLD & CO.
SOUTH WETHERSFIELD, CONN.

WE have a very large Market Gardeners and Farmers trade and we please our customers by sending them the best of seeds and certainly our prices are very reasonable.

Our Catalogue is free to all Seed Planters. Send us the address of parties you think would be interested in it that we may mail them one.

WE have one of the finest Market Gardeners and Farmers trade in the country and we wish to increase it 25,000 new customers this year. Our firm has been in the seed growing business for over sixty years, formerly growing seeds exclusively for the wholesale trade. About twenty years ago we started a Market Gardeners and Farmers trade, selling direct to the seed planter, and our business in this line has increased so rapidly that we have practically given up our wholesale trade and are now giving nearly our entire attention to this Market Gardeners and Farmers trade.

We plant many seeds ourselves and we realize that the seed planter wants the very best seeds he can purchase as it certainly pays no one to plant poor seeds, and he wants the best at reasonable prices. This year we have cut out all discounts, etc., and make very low cash prices for first class seeds. We ask you to compare our prices with the prices of other reliable seedmen.

Our office and buildings are on our own seed farms which makes our business expenses comparatively light and we do not spend large sums of money for advertisements and fancy catalogues, but send out this plain catalogue of best of seeds, at low cash prices. Now if you use seeds, no matter whether in small or large quantities, please look through this catalogue carefully, make out an order and send it to us and we will do the best we can to please you.

We take this opportunity to thank our many customers for their liberal patronage in the past and trust that we shall continue to receive their favors.

Respectfully yours,

THOMAS GRISWOLD & CO.

THOMAS GRISWOLD & CO.,
South Wethersfield, Conn.

TERMS.

We make our prices so low that we can afford to give credit only to reliable parties well known to us and only in limited amounts, and when credit is allowed interest at the rate of six per cent. per annum will be added. By doing principally a cash with order business we run little risk and can make very reasonable prices which is a benefit to our customers. Out-standing bills are due June 1st, 1909, unless otherwise agreed.

How to send money.—Remit by Post Office or Express Money Order, Registered Mail or Bank Draft. Postage Stamps may be sent for small amounts. Personal Checks accepted from parties having established credit.

Post Office Money Orders should be made payable at South Wethersfield.

When Seeds are Wanted by Mail, postage must be added at the rate of 8 cents per pound for Seeds, (except flower seeds), 10 cents per quart for Corn and Onion Sets, and 15 cents per quart for Beans and Peas.

Bags, barrels, etc., free of charge. No charge for cartage. Purchasers pay express and freight charges unless otherwise agreed.

Shipping Instructions should accompany each order. If no such instructions are received we will ship by the best and cheapest route known to us.

After shipping in good order our responsibility ceases, claims for damages or miscarriage must be laid on the carriers.

Parties purchasing from us, and wishing references as to our business integrity are respectfully referred to R. G. Dun & Co's, and Bradstreet's Mercantile Agencies, also to our Postmaster, or Town Officers.

As so much depends upon the condition of the weather, soil, etc., when seeds are planted, and the care taken in planting them, we sell our goods, in common with other reliable seed houses, subject to the following disclaimer adopted by the American Seed Trade Association.

Disclaimer.—We give no warranty, express or implied as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

MAINE GROWN SEED POTATOES.

There is probably no crop grown that is benefited more by change of seed than the potato. This has been demonstrated extensively by ourselves and others in this vicinity and proven that the Northern Grown Seed produces much better results both in yield and quality of the potatoes, and growers realize this fact and are planting more every year of this Maine grown stock in preference to their native seed. We have thousands of bushels of these potatoes contracted for and stored in frost-proof cellars in Maine to be shipped to us in the spring and expect they will reach us about April 10th. And can be reshipped to our customers direct from the cars as soon as they arrive.

The prices we quote are what seems to us fair prices at the time this catalogue is printed but are subject to market fluctuations.

**We furnish seed to Granges, Farmers' Clubs, Public
and Private Institutions and thousands of individuals.**

Let us supply your wants in this line.

GRASS SEED.

We are Headquarters for High Grade Grass Seed. Don't buy a Poor Grade. The Best is far the Cheapest in the end.

Many a farmer makes a mistake by buying a cheap grade of seed thinking he is saving money by so doing, but think of the result. Suppose it does cost a few cents more an acre to seed down your land with good seed, what is that compared to sowing a low grade of seed, filling your land full of weeds and being disappointed in the hay crop. You can buy a cheap grade of seed in the market if you wish it, but we don't care to handle cheap grades, they are very unsatisfactory.

We sell tons and tons of high grade seed, and our trade is rapidly increasing. This is the seed you should buy. Prices subject to market fluctuation.

Field and Ensilage Corn.

Field and Ensilage Corn is generally a very important crop with the farmer and it is well for him to take special pains to plant good stock. Most of our Field and Ensilage Corn is grown for us in the Nebraska corn belt, where it matures to perfection, and is of strong vitality, and also a change from corn that is grown here in the East year after year.

THOROUGHbred LEAMING

A leader of the Yellow Dent varieties and is extensively grown for ensilage purposes. It is a strain of the Improved Leaming, bred up to its highest efficiency, ripening about the same time as the old style, kernels and ears more uniform, better filled out and of much purer type. It has a good sized stalk with abundance of leaves and is a heavy yielder of large, handsome ears, making it a valuable variety for general purposes.

Ninety-Day Yellow (true stock); probably the earliest field corn in cultivation; bright yellow flint, small cob and very prolific. A bushel of ears generally shelling about 24 quarts of shelled corn,

Early Canada Yellow. Medium size flint corn, extensively grown in New England,

A well kept flower garden is an ornament to a place, and flowers are a pleasure and a blessing to a home. On the following pages we list a line of choice flower seeds imported direct from one of the best flower seed growers in Europe.

FLOWERS should be in every garden, they not only help to beautify the home but give you a healthy out-door occupation in caring for them. Many a person would enjoy better health to-day if they had something to interest and bring them out

more into the sunshine and pure air, and what is better for this than a nice flower garden, for any one that loves flowers. Let the children have a little flower garden and teach them the value and care of flowers, they will take more interest in them than you may think. Try a few of the old fashion varieties that your mother and grandmother used to grow, and are so popular to-day. We give very liberal packets for the money probably double what some seedmen give.

Annuals—Bloom first year from seed and plant dies after one season.

Biennials—Bloom second year from seed and plant dies after second year.

Perennials—Bloom second year from seed and plant lives and blooms for several years.

Tender—Means plant will not stand the least frost.

Half-Hardy—Means plant will stand a little frost and needs protection.

Hardy—Means plant will stand considerable frost.
